

ZEDHOST

Hosted Exchange

Cloud Email

Business email as it's meant to be: reliable, accessible from anywhere, and managed by someone else.

Our Hosted Managed Exchange gives you immediate access to feature-rich, Enterprise Class email without incurring any infrastructure costs. And we will support, manage and protect it, giving you the resilience you need in such a business-critical function.

The email user experience is identical to having Microsoft Exchange on your own server, with all the enhanced features of the latest version of Microsoft Outlook 2010, Microsoft Outlook Web Access and Microsoft Outlook Mobile Access which are all included free.

But because the Exchange is hosted in our secure data centre, you don't have to set it up or maintain it. We look after everything, from initial migration to ensuring your staff have true 'connect-anywhere' mobility, leaving you to concentrate on running your business.

Slash email costs by 40% per user: no capital expenditure and reduced operating costs

Instead of using expensive servers, infrastructure and software, you simply take email services on demand when you need them from our secure data centre in return for a low monthly subscription fee. You can add users, increase mailbox storage capacity as and when your requirements grow - you don't need to invest in advance.

Not only do you avoid unnecessary capital expenditure, you also minimise running costs. The less infrastructure you own, the less you have to manage and maintain.

You won't have to buy, install or manage any software. It's our job, not yours, to keep you updated with the latest versions of Outlook.

All account configuration and email administration is also done by us, so you won't have to spend any time or money making sure your email does not fall over or succumb to viruses.

Keeping your staff in touch - wherever they are and whatever device they use

The Zed One Managed Hosted Exchange is a 'Cloud Email' service so users can access their Outlook email, address book, calendars and public folders from anywhere with an internet connection - whether at home, in the office, on the move or abroad.

We offer full integration with iPhone, Windows Mobile and BlackBerry, so each email account retains one inbox across all devices.

Once they are connected, your email users gain synchronised up to date access to shared calendars, shared contacts and public folders helping them work more productively and collaboratively.

Enhanced security, reliability and business continuity

We deploy updates and patches almost instantly, guarding you against threats.

All data is held securely on our Virtual Blade/SAN infrastructure which is staffed and protected 24/7/365. This operates on a highly available, fully resilient basis with redundancy to ensure 99% availability.

Because your email is no longer hosted on your local server, you can stop worrying about threats to server performance and reliability, such as over-heating, power surges or malicious attacks.

There is no need for you to make back-up tapes to ensure business continuity. Even if your office is hit by a disaster, your email will still be safe and accessible via the internet.

Key Business Benefits

- No IT or email expertise needed
- Latest feature-rich Exchange 2010 email
- Lower running costs
- No new infrastructure required
- Easier remote working
- Enhanced security
- Guaranteed uptime
- Fully managed migration
- Fast & easy scalability

Key triggers for switching to Zed One's Hosted Managed Exchange

- Server upgrade/replacement needed
- Overstretched IT team
- Email functionality/performance review
- IT cost savings
- Business-wide move to cloud computing solutions

The Zed One difference: A Fully Managed Service

Unlike our competitors, we provide a full management service. You won't even have to think about email administration and support.

We will do it all for you - right from the initial migration, which we will manage for you.

If you want to add or remove users or increase mailbox sizes or change your mailbox settings, you simply tell us. We will do all of the techie stuff for you.

We can also supply you with the latest version of Outlook 2010, so you never miss out on the latest enhanced features available (see panel)

Support whenever you need it

We are available 24/7/365 to help and support our customers. We resolve 95% of cases on our first response and 98% of these in less than 10 minutes.

Personal touch

We don't outsource our support. All calls are handled by our own qualified IT people. As a Zed One customer, you will be supported by a small knowledgeable team who know you and your business which means we can build a relationship together just as you would with an in-house IT support team.

Immediate access to Microsoft Exchange 2010

Microsoft Exchange 2010* is the world's leading business email system, facilitating communication and collaboration among your employees. Its rich features include:

- ◆ Real-time-synchronised email, files, calendars and contacts through Microsoft Outlook client

A range of services to take care of all your business IT requirements

This is just one of the many IT services we provide including cloud computing, on-premise solutions, connectivity, IT support, telephony, office IT moves and hardware/software supply configuration and installation.

For information about individual services, or how we could provide a one-stop solution for all your IT needs, please call us, send us an email or request a call back via our website.

Expert help and advice is only a phone call away

We are business IT experts so you don't have to be. If you're unsure what your business needs, give us a call for some expert free advice.

We've probably advised dozens of organisations in similar circumstances. We are not tied to any suppliers or committed to only one type of solution. And we are ready and willing to help.
